DVTCare™ Systems
Ca5/Ca5TA
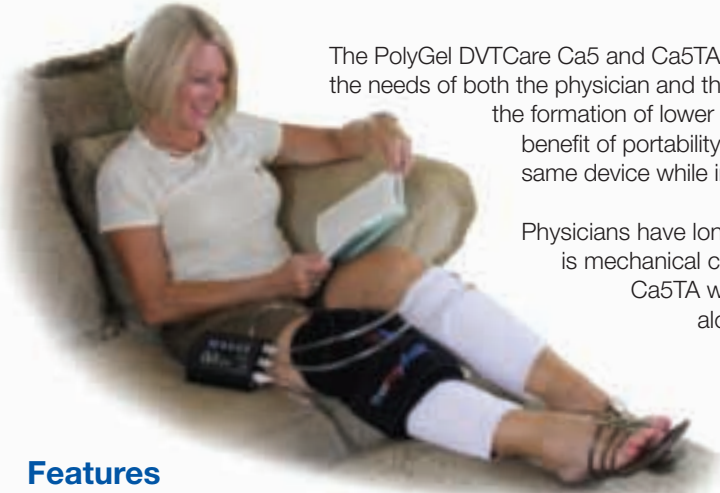

Versatile   Portable   Effective

*Approximately **300,000** Americans die each year
from DVT-related Pulmonary Embolism (PE) in the U.S.**

Prevent DVT with the…

POLYGEL®

Ca5TA DVTCare™ System

with Therm*Active*

The PolyGel DVTCare Ca5 and Ca5TA with ThermoActive™ Systems were developed to meet the needs of both the physician and their patients. Both provide an effective solution in preventing the formation of lower extremity deep vein thrombosis (DVT) with the added benefit of portability. Now high risk patients can receive treatment from the same device while in the hospital, in surgery centers, at home, or on the go.

Physicians have long recognized that the gold standard for DVT prophylaxis is mechanical compression. By either combining the DVTCare Ca5 or Ca5TA with pharmacologic "blood thinners" or using this system alone, physicians now have a portable, light weight option to provide the best possible DVT prophylaxis available.

The Ca5 is a simple and portable solution for the prevention of DVT utilizing sequential compression, while the Ca5TA has all the advantages of the Ca5 **plus intermittent cold or hot compression** on the surgery site utilizing ThermoActive™ supports.

PolyGel DVTCare units are simply a Portable, Versatile and Effective solution for DVT prevention.

Features and Benefits

- Lightweight and portable - weighs less than 1 lb (.425 kg)

- Portability leads to increased compliance

- Battery operated
   > 15 hrs of battery life for single leg therapy
   > 8 hrs of battery life for dual leg therapy and joint compression

- Variable Pressure Setting - able to adjust pressure to patient tolerance

- Works with the entire line of ThermoActive™ supports

- One-year warranty on Ca5TA unit

- Code for Ca5TA is E0675/E0676

- Code for segmented cuff is E0673

The Ca5TA with ThermoActive System includes:

- Ca5TA DVTCare pump

- 2 segmented cuffs

- 5 feet of joint compression hose with connectors

- Carry pouch with strap

- Durable carry case

- Power supply

- ThermoActive support (optional accessory)

optional accessory

TECHNICAL SPECIFICATIONS

Size:	5.9" x 3.9" x 1.6" (15cm x 10cm x 4cm)
Weight:	15oz (.425 kg)
Power Input:	12V DC 1A
Battery:	6V DC
Battery Life: (Single Leg):	15 Hours
Recharge Time:	3.5 Hours
Pressure:	
Leg Garment:	Default 50mm Hg
Adjustable Range:	30 - 65mm Hg
Joint Compression:	Default 35mm Hg
Adjustable Range:	15 - 45mm Hg

Ca5/Ca5TA FAQ's

Q. Will the pump operate when I have it plugged in?

A. Yes. The pump works on battery and when it is plugged into the wall.

Q. Can the sleeves be worn in direct contact with my skin?

A. Yes. The sleeves can be worn against the skin. If contact dermatitis occurs place a thin sock between the skin and the cuff.

Q. Do I need to change the pressure of the sleeve?

A. No. The pressure is preset.

Q. Can I wash the cuffs if they become soiled?

A. The cuffs are meant to be single patient use but can be hand washed with mild soap and water, and air dried.
